

STORT ESKENS

WEEElink Registration number WEE/EE1165QV

The European Parliament Directive 2002/96/EC, also referred to as the “WEEE Directive”, places an obligation on EU-based manufacturers, distributors, retailers and importers of electrical and electronic equipment to integrate the instructions of use of such equipment with information concerning its disposal, re-use, recycling and/or further treatment.

As a main rule, the WEEE Directive requires that the electrical and electronic equipment is disposed of at the end of its useful life in an environmentally responsible manner, so as to enable the re-use or recycling of those parts and materials that have been identified for this purpose.

It is obligatory not to dispose of Waste Electrical and Electronic Equipment (WEEE) with unsorted municipal waste, and to carry out separate collection.

Separate collection is the precondition to ensure specific treatment and recycling of the WEEE and the crossed-out wheeled bin symbol on the equipment label – as repeated here below – indicates this requirement.

Pursuant to the WEEE Directive, collection, treatment, recovery and environmentally sound disposal of WEEE from users of products containing electrical and electronic equipment put on the market after the 13th August 2005, shall be carried out in compliance with the national measures of each EU-Member State implementing the WEEE Directive.

For more information about proper disposal and recycling of your product, please contact dw@storteskens.com
